Area of Polygons

Polygon – a 2-dimensional shape that is made of at least three straight lines and is "closed".

Name	Shape	Definition	Formula
Square		A shape that has four equal length sides and four right angles.	$A = s^2$ or $A = bh$
Rectangle		A shape that has two pairs of parallel lines but one pair is longer than the other; has four right angles.	$A = bh$
Parallelogram		A four sided shape that has two pairs of parallel lines but does not have right angles.	$A = bh$ <small>(Remember to find the height by drawing a right angle from the base to the highest point on the shape.)</small>
Trapezoid		A four sided shape with only one pair of parallel sides.	$A = \frac{h(a+b)}{2} = \frac{1}{2}h(a+b)$ <small>(Remember to find the height by drawing a right angle from the base to the highest point on the shape.)</small>
Triangle		A three sided shape with three angles.	$A = \frac{bh}{2}$ or $\frac{1}{2}(bh)$ <small>(Remember to find the height by drawing a right angle from the base to the highest point on the shape.)</small>
