Aviva plc Interim Results 2018

Average Annual report and accounts 2012

Our plan to change Aviva continued

Narrow focus

When we assessed our business we identified 58 distinct revenueearning business areas. 15 of them were performing particularly well. 27 weren't realising their full potential and 16 were performing below acceptable levels. We decided to:

- Focus on businesses where we can produce attractive returns
- Improve underperforming businesses
- · Exit businesses which we do not consider central to our future growth

Build financial strength We resolved to improve our economic capital levels so that they are in line with our industry peers. We plan to do this by making disposals and reducing the amount of capital we allocate to businesses producing lower returns. Our goals were to:

- Maintain an economic capital coverage ratio of between 160% and 175%
- Reduce capital volatility

Improve performance We concluded we must deliver better revenue growth, lower losses and claims, and improved profitability. We decided to:

- Develop new revenue growth, mainly in our core UK, European and Canadian markets
- Reduce annual expenses by £400 million by the start of 2014
- Change our culture to remove bureaucracy and ensure our people perform to their full potential

Aviva plc + annual report. Aviva plc parent company.
